Welcome!

You have reached the website of cross-border health services contact point.

The task of the national contact point is to provide information to Estonian patients, primarily on covering the costs of planned cross-border health care services received in other EU member states.

The national contact point will also provide information to patients covered by health insurance in other EU states on the general rules on the provision of planned cross-border health care services in Estonia.

The national contact point also provides other related information for people who want to visit another EU member state to receive planned health care service.

The national contact point is administrated by the Ministry of Social Affairs and in the performance of its duties it collaborates with the Estonian Health Insurance Fund, the Health Board, the State Agency of Medicines and health care providers.

Důležité upozornění - změna názvu CMU

Last Updated on 09 November 2015

Rozhodnutím Rady CMU ze dne 8. 9. 2015 dojde ke změně názvu Centra mezistátních úhrad z.s.p.o., které se k 1. 1. 2016 změní na Kancelář zdravotního pojištění z.s. (dále Kancelář ZP). Z hlediska činnosti CMU se kromě nového názvu nic nemění. Souběžně dochází ke sloučení Národního referenčního centra z.s.p.o. (dále NRC) s Kancelář ZP. Kancelář ZP je nástupnickou právnickou osobou a přebírá tak práva a závazky dosavadního NRC.

Kancelář ZP bude nadále plnit úkoly styčného orgánu a národního referenčního centra pro provádění národních předpisů v oblasti veřejného zdravotního pojištění i mezinárodních smluv o sociálním zabezpečení a práva Evropské unie. Bude zajišťovat i další potřebné společné činnosti pro oblast veřejného zdravotního pojištění ČR. Členy a zřizovateli Kanceláře ZP jsou všechny veřejné zdravotní pojišťovny, působící na území České republiky.

V Praze dne 9.11.2015
JUDr. Ladislav Švec, ředitel

What is Contact point?

Contact point is an information centre, providing information regarding our (hereinafter - Latvian) national health care system and procedure for obtaining cross-border health care services.

- » A list of contact points of all Member States are posted on a web-page of the European Commission.
- » You may find out information regarding the health care system of a particular state from the contact point/information centre of a particular state. **The National Health Service** performs the function of the Contact point/ information centre in Latvia.

How to use the Contact point?

Contact point/ information centre provides information:

- » on web-page;
- » by telephone through toll free line to citizens of Latvia 80001234 (between 8.30 to 17.00 o'clock on working days), as well as by telephone +371 67045005 for calls from abroad (between 8.30 to 17.00 on working days);
- » by e-mail: nvd@vminvd.gov.lv.

Cross-Border Healthcare Contact point > Healthcare Service Providers

Healthcare Service Providers

24.07.2014. | Print

To provide healthcare services, medical institutions, healthcare professionals, and medical support staff must be registered following the procedures established in the national regulatory acts. Furthermore, medical institutions must comply with the established mandatory requirements. The state funded healthcare services are provided by the medical institutions which have an agreement with the state on the provision of such services.

- Healthcare professionals — persons who have medical education and provide medical services
- Medical support staff — persons who are not entitled to provide medical services, but are directly involved in the healthcare processes
- Medical institutions — doctoral practices, state and local government institutions, businesses which are listed in the Registry of Medical Institutions, comply with the mandatory requirements established for medical institutions and their structural units in the regulatory acts, and provide medical services

Healthcare professionals and medical support staff

- The healthcare professional or medical support staff involved in the provisions of medical services:
- shall have the due qualification evidenced by a diploma issued by the respective educational institution;
 - shall be listed in the Registry of HealthCare Professionals and Medical Support Staff.

The persons listed in the Registry of Healthcare Professionals and Medical Support Staff are allowed to provide medical services in the respective profession independently within the competence limits established by the Cabinet of Ministers.

The following shall be entered into the Registry of Healthcare Professionals and Medical Support Staff:

- healthcare professionals: doctors, dentists, medical nurses, midwives, medical assistants (paramedics), assistant nurses, cosmeticians, beauty care specialists in cosmetology, dental paramedics, dental nurses, dental hygienists, assistant dentists, physiotherapists, ergotherapists, equine therapists, technical orthopaedists, speech language therapists, assistant

Databases

Submission to the State Health inspection

Start / HEALTH CARE / Medical tourism

Medical tourism

Medical Tourism is where people who live in one country travel to another country to receive medical, dental and surgical care while at the same time receiving equal to or greater care than they would have in their own country, and are traveling for medical care because of affordability, better access to care or a higher level of quality of care.

Like other countries, Latvia also has health care providers offering health care services to medical tourists. One of the requirements for medical tourism service providers is registration in the Registry of Medical Institutions. Such registration ensures that medical institution is working in compliance with legislation of the Republic of Latvia and is duly supervised by the Health Inspectorate.

Health Inspectorate maintains a database of health care providers registered as health care tourism service providers. Health care providers are added to the database of medical tourism service providers if they have been registered in the Registry of Medical Institutions for at least 3 years and if Health Inspectorate has had positive compliance check giving assurance that the service provider meets the requirements set out in the legislation of the Republic of Latvia.

This link will guide you to the database of [Medical tourism service providers](#) (28.08.2015., PDF, 62.4 KB).

To learn more about particular health care provider's services, you may contact the institution directly either by phone or e-mail available in the database.

To become a medical tourist, citizens of the European Union must prior to arrival agree with service provider in Latvia on availability of required service. Citizens of third countries must also acquire Schengen visa for entry into Latvia.

Medical tourists applying for Schengen visa must acquire an invitation from Latvian health care provider which will be providing the required service and is registered in the Registry of Medical Institutions.
